BASIC / ADVANCED MANAGEMENT

Versa™

Flexible by Design

With shared and assigned use capabilities, Versa keypad locks enable storage options with flexibility to adapt to the ever-changing needs of your team—our most versatile lock, Versa provides enhanced, simplified security to any storage solution.

Digilock®

It's All About Versatility

Versa keypad electronic lock solutions seamlessly integrate into your workspace environment while providing enhanced security and protection.

Operate easily with an alphanumeric keypad interface or with an ADA-compliant user key.

Versa keypad is the perfect option for any location, designed especially for spaces with frequent changes in users.

Engineered for Anywhere

From inspiration to installation, we partner with our customers in many industries to ensure that their facilities offer the latest in personal security solutions, providing convenience and peace of mind.

- Workplace
- Healthcare
- Hospitality
- Retail
- Manufacturing
- Government

Combining quality construction with state-of-the-art security, Versa is perfect for the most demanding environments. Easily managed and simple to use, our lock solutions modernize any space with improved flexibility and collaboration.

All Versa models are available in both surface and recess mount.

Key Features

Product

- IP55 rated, FCC, CE and IC certified

FUNCTIONALITY

Choose the Use Case That's Right for You.

SHARED USE

A simple day-use solution, shared-use functionality lets the User select any available storage space and enter any 4-7-digit code to lock and the same code to unlock a Versa unit. When the current user is done and the storage space is vacated, Versa is ready for the next user and code.

OR

ASSIGNED USE

If you need to assign storage for a longer period of time, assigned use lets Management program single or multiple codes to the lock for the User or Users. Each user enters the assigned code to unlock a Versa unit. To lock, the user closes the door and then turns the knob back to the locked position. The slam cam option automatically relocks when the door is closed.

3 MANAGEMENT

Two Management Systems. One Smart, Scalable Solution.

Basic:

Digilock's original, electronic key system provides reliable and cost-effective security and flexibility.

- A single yellow Programming Key assigns up to 6 Manager Keys per system
- Assign up to 20 different Users per lock
- Provides Management override access
- Provides external power against battery failure
- Elapsed-time auto unlock

OR

Advanced:

Digilock's advanced management system is built on the same time-tested, security architecture but leverages the processing power of the mobile tablet and application to provide more powerful tools and easier, more detailed system management.

- A single white Data Key assigns up to 250 Manager Keys per system
- User/Manager database simplifies assignment/reassignment of up to 250 Users and 250 Managers per lock
- Audit trail and usage data analytics reports
- Simple, visual battery-level indicator
- Real-time clock allows scheduled auto unlock
